HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** to handle core business logic, integrating with PostgreSQL databases for data persistence.
- Designed and implemented **RESTful APIs** for inter-service communication, ensuring robust data exchange and adherence to API design best practices.
- Managed and troubleshot production incidents for enterprise applications using **Splunk and Dynatrace**, resolving P1/P2 issues within defined SLA targets.
- Automated data extraction, transformation, and loading processes using **Python scripting** and SQL, reducing manual reporting effort by approximately **15 hours** per week.
- Implemented robust diagnostic and troubleshooting procedures for complex distributed systems, reducing mean time to resolution for critical issues by **20%**.
- Collaborated with cross-functional teams to gather requirements and implement features for a **payments operations dashboard**, ensuring operational visibility and alerting.
- Containerized applications using **Docker** and managed deployments on **AWS EC2 instances**, improving deployment consistency and reducing environment setup time.

SKILLS

Databases – MongoDB, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, Google Cloud Platform

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, FastAPI

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Concepts – Distributed Systems, Systems Administration, Database Architecture, Performance Tuning, Application Architecture, Data Architecture, Agile Methodologies

PROJECTS

Cloud-Native MongoDB Deployment and Management

- Designed and implemented a scalable MongoDB deployment on **AWS** using **EC2 instances** and managed it via **Cloud Manager** for automation, backup, and monitoring.
- Developed custom **Python scripts** to automate database health checks and performance benchmarking, generating reports on key metrics like query latency and memory usage.
- Configured monitoring and alerting using **CloudWatch** and integrated with internal ticketing systems to proactively address potential issues before they impacted service availability.

Distributed Systems Performance Analysis Tool

- Engineered a diagnostic tool in **Python** to capture and analyze performance metrics from distributed systems, focusing on identifying bottlenecks in network I/O and CPU utilization.
- Developed an API using **FastAPI** to expose diagnostic data, allowing for real-time querying and integration with external monitoring dashboards.
- Applied principles of **systems administration** and **database architecture** to simulate various load conditions and validate the tool's accuracy in identifying performance regressions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
