PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts for automating data extraction and transformation tasks, reducing manual processing time by approximately **40%**.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately **500 requests per minute**.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets.
- Wrote complex **SQL** queries across **PostgreSQL** and **MySQL** databases for data validation, ad-hoc reporting, and schema evolution.
- Containerised multiple **Java** applications using **Docker**, improving deployment consistency and enabling faster iteration cycles.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, participating in sprint planning, daily stand-ups, and retrospectives.
- Supported and integrated with enterprise business systems, managing change control for configuration updates and coordinating **UAT**.

PROJECTS

Enterprise System Integration Framework

- Developed a **Java Spring Boot** microservice framework to standardize integrations between disparate enterprise systems, including a core ERP platform.
- Implemented robust error handling and logging mechanisms using **Spring Boot Actuator** and **Splunk**, improving system observability for production support.
- Designed and built RESTful APIs for data exchange, ensuring seamless communication across multiple business units and reducing integration overhead by an estimated **30%**.

Automated Reporting Pipeline

- Engineered a **Python**-based ETL pipeline to automate the generation of weekly operational reports from multiple data sources, including relational databases.
- Wrote complex **SQL** queries to extract and transform data, ensuring data integrity and accuracy for business intelligence reporting.
- Deployed the pipeline using **AWS Lambda** and scheduled execution via **CloudWatch Events**, delivering reports consistently to stakeholders.
