PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the incident response lifecycle for business-critical applications, resolving an average of **15 P1/P2 incidents per month** within defined SLAs using **Splunk** and **Dynatrace**.
- Developed **Python scripts** to automate daily reporting tasks and data extraction processes, reducing manual effort by approximately **8 hours per week** for the operations team.
- Executed change management procedures for system configuration updates, coordinating User Acceptance Testing (UAT) and providing post-go-live support for enterprise systems.
- Provided **hands-on IT support** to local users, addressing hardware, software, and network issues, and managing user access requests through the **ManageEngine** ticketing system.
- Supported the implementation of new business applications and integrations, including system testing and updating technical documentation for operational use.
- Collaborated with **third-party suppliers** and the wider European IT team to resolve complex technical issues and identify root causes for service improvements.
- Containerized legacy applications using **Docker** to improve deployment consistency and managed them on **AWS EC2** instances, simplifying environment provisioning.

SKILLS

Application Support – Incident Management, Root Cause Analysis, Change Management, System Testing, Documentation, SLA Management, User Support

Core Technologies – Java, Spring Boot, Python, SQL, PostgreSQL, MySQL, Oracle, Linux, Shell Scripting, Git

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins

Monitoring & Ticketing – Splunk, Dynatrace, ManageEngine, Jira, Confluence

Operating Systems – Windows Server, Microsoft 365

Scripting & Automation – Python, PowerShell

Databases – Relational Databases, Data Validation, Schema Changes

PROJECTS

Enterprise Application Support Enhancement (HCL Technologies)

- Enhanced production support for a suite of enterprise applications by developing automated health checks and alerting mechanisms using **Python** and **AWS CloudWatch**, reducing critical alert response times by **18%**.
- Streamlined data reconciliation workflows for a financial services dashboard by building custom SQL scripts and **Python** ETL jobs that processed approximately **5,000 transactions** daily, improving data accuracy.
- Authored comprehensive technical documentation and runbooks for critical applications, facilitating smoother incident triage and knowledge transfer for the support team.

User Access Management System Upgrade (HCL Technologies)

- Supported the upgrade of an internal user access management system, migrating user data and permissions across **PostgreSQL** and **MySQL** databases.
- Assisted in coordinating User Acceptance Testing (UAT) with business stakeholders for the upgraded system, gathering feedback and logging defects within **Jira**.
- Implemented basic role-based access control logic in **Java Spring Boot** for a new module, ensuring adherence to enterprise security policies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
