PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported business units in assessing **AI and automation opportunities**, translating complex business problems into actionable use cases with defined benefits and risks.
- Reviewed existing business processes to identify and document opportunities for **AI enablement and automation**, contributing to the organisation's AI strategy.
- Assisted in the design and co-development of **AI agents and tools** with business units to address specific operational needs and enhance efficiency.
- Prepared supporting documentation for **AI intake, prioritisation, risk assessment, and governance processes**, ensuring alignment with organisational controls.
- Monitored and summarised developments in **AI and automation**, including public sector guidance and regulatory requirements, assessing their implications for the NTMA.
- Engaged with stakeholders through workshops, research, and analysis to support **AI and continuous improvement initiatives**, facilitating clear communication of progress and outcomes.
- Containerised Python-based AI services using **Docker** and deployed them to a **Kubernetes** cluster, managing configuration and resource allocation on **AWS**.

SKILLS

AI/ML Concepts – Artificial Intelligence, Automation, AI Agents, AI Strategy, Risk Assessment, Governance, Continuous Improvement

Programming Languages – Python, SQL, Java

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, Git

Data & Analytics – Data Analytics, Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Backend Technologies – Spring Boot, REST APIs, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

AI Opportunity Assessment Framework (HCL Technologies)

- Developed a structured framework for assessing AI and automation opportunities across enterprise systems, incorporating business problem definition, use case articulation, and benefit/risk analysis.
- Created Python scripts to automate data extraction and initial analysis for potential AI use cases, reducing manual effort by approximately 40% for initial evaluations.
- Designed process flow diagrams and documentation templates to support stakeholder workshops and gather requirements for AI enablement initiatives.

Automated Reporting Service with Python and Power BI (HCL Technologies)

- Engineered Python scripts to automate the extraction, transformation, and loading (ETL) of data from PostgreSQL and Oracle databases for operational reporting.
- Built and deployed interactive **Power BI dashboards** to visualise key performance indicators and operational metrics for financial services clients, enabling faster decision-making.
- Implemented scheduled jobs using cron on Linux to ensure timely data refreshes for the reporting dashboards, maintaining data currency for users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
