HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise applications, focusing on robust error handling and asynchronous processing patterns.
- Engineered **Python** data pipelines to automate ETL processes, transforming and loading data from diverse sources into a centralized data warehouse, processing approximately 1.5 TB of data weekly.
- Managed production support for critical enterprise systems using **Splunk** and **Dynatrace** for monitoring and incident response, consistently meeting SLA targets for P1 and P2 incidents.
- Implemented infrastructure automation using **Terraform** and **Ansible** to provision and configure cloud resources on **AWS**, reducing manual deployment time by 40%.
- Designed and deployed containerized applications using **Docker** and managed orchestration on **Kubernetes (EKS)**, ensuring high availability and efficient resource utilization.
- Collaborated in **Agile** ceremonies, including sprint planning and code reviews, to deliver features and enhancements for enterprise software solutions.
- Conducted in-depth analysis and troubleshooting of complex issues across diverse application domains and platforms, resolving an average of 5 critical issues per sprint.

SKILLS

Scripting Languages – Python, Bash, PowerShell

DevOps & CI/CD – Jenkins, Git, Docker, Kubernetes, Terraform, Ansible

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Programming Languages – Java, Spring Boot, Python, SQL

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Linux

PROJECTS

Cloud Infrastructure Automation with Terraform

- Automated the provisioning and configuration of scalable **AWS** infrastructure for a new microservices deployment using **Terraform**, enabling self-service resource creation for development teams.
- Developed reusable Terraform modules for common infrastructure patterns (e.g., VPCs, EC2 instances, RDS databases), increasing deployment consistency across projects by 30%.
- Integrated **Ansible** playbooks into the CI/CD pipeline to automate application deployments and configuration management on provisioned cloud resources.

Python-based ETL Pipeline for Data Ingestion

- Built a robust **Python** ETL pipeline using **pandas** to ingest, clean, and transform data from multiple external APIs and databases, supporting a daily data volume of approximately 200 GB.
- Implemented data validation checks and error logging within the pipeline to ensure data integrity and facilitate debugging, reducing data quality issues by 15%.
- Scheduled and monitored pipeline execution using cron jobs and basic alerting mechanisms, ensuring timely data availability for downstream analytics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
