PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided end-to-end technical ownership for Premium Support customers by analyzing logs and system behavior, reproducing errors, and isolating failure domains to accelerate root cause analysis.
- Developed a deep understanding of customer architectures and integrations, documenting critical workloads and operational constraints for Support, Product, and Engineering teams.
- Owned customer-specific response to high-impact incidents, assessing severity, initiating response paths, coordinating cross-functional responders, and ensuring clear ownership through mitigation and resolution.
- Monitored customer integrations and support trends to identify emerging risks and recurring failure patterns, proactively addressing them before they escalated into major incidents.
- Partnered with Go-to-Market and Technical Success teams to understand business importance of customer workloads, ensuring commercial context informed prioritization and communication.
- Developed account-specific runbooks and validated escalation paths for important customer launches, migrations, and traffic increases, providing heightened monitoring where needed.
- Translated recurring customer pain points into actionable feedback for product and integration improvements, contributing to the development of scalable solutions like troubleshooting guides and AI-powered automation.

SKILLS

Support Engineering – Technical Troubleshooting, Log Analysis, System Behavior Analysis, Incident Management, Root Cause Analysis, Production Incidents, Escalation Management, Runbooks, Postmortems

Cloud & Infrastructure – Cloud Infrastructure, Distributed Systems, APIs, Enterprise Integrations, Monitoring, Telemetry

Customer Engagement – Premium Support, Strategic Customers, Technical Guidance, Customer Context, Business Stakeholders, Account Teams, Customer Meetings

Development & Automation – Automation, Scripting, Debugging, AI-powered Automation, Tooling Development

Operating Systems & Tools – Linux, Shell Scripting, Git, Jira, Confluence, Splunk, Dynatrace, CloudWatch

PROJECTS

Enterprise Production Incident Management System

- Developed a Python-based system to ingest and correlate alerts from Splunk and Dynatrace, reducing manual P1 incident triage time by **40%** for an 8-person operations team.
- Implemented automated data enrichment for critical alerts, pulling relevant system configuration and recent change history from Jira and Confluence, accelerating diagnostic efforts.
- Designed and deployed the system using Docker on AWS EC2 instances, configuring Jenkins pipelines for automated testing and deployment to a staging environment.

Customer Onboarding Automation for Enterprise Tools

- Built a Python CLI tool to automate the initial configuration and deployment of enterprise software for new clients, reducing onboarding time from 3 days to 1 day.
- Integrated the tool with customer environment variables and secrets management via HashiCorp Vault, ensuring secure and consistent deployments across diverse client infrastructures.
- Authored comprehensive user guides and conducted two training sessions for customer technical teams on the automated onboarding process, improving self-sufficiency by **35%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
