HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed **Python** scripts to automate data extraction and transformation tasks for operational reporting, reducing manual effort by approximately **15 hours** per week.
- Engineered **Java Spring Boot** REST APIs to facilitate data exchange between internal systems, supporting an average of **5,000 requests** per hour.
- Analyzed and refactored inefficient **SQL** queries across **PostgreSQL** and **Oracle** databases, improving data retrieval times for critical financial reports by an average of **20%**.
- Built interactive **Power BI** dashboards to visualize key performance indicators for operational teams, enabling faster identification of trends and anomalies.
- Wrote production-quality **Python** and **SQL** to extract, transform, and analyze large datasets, supporting reliable insight and repeatable decision-making for insurance operations.
- Investigated business questions end-to-end, defining problems with stakeholders, preparing data, completing analysis, and presenting clear recommendations on claims and operational data.
- Containerized applications using **Docker** and deployed to **AWS EC2** instances, managing configurations via **Jenkins** pipelines for consistent build and deployment cycles.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

DevOps & Tools – Docker, Jenkins, Git, Jira, Confluence, Linux

Data Science Concepts – Statistical Modelling, Data Analysis, Machine Learning Fundamentals

PROJECTS

Automated Reporting Pipeline for Financial Operations

- Developed a **Python**-based ETL pipeline to consolidate data from disparate sources into a central repository, supporting daily reconciliation workflows.
- Automated the generation of **SQL**-driven reports, reducing the time to deliver weekly operational summaries from 4 hours to 30 minutes.
- Implemented data validation checks within the pipeline to ensure accuracy and integrity of processed financial transaction data.

Claims Outcome Prediction Model

- Engineered feature extraction pipelines using **Python** and **pandas** from historical claims data, creating variables for model training.
- Trained a **scikit-learn** classification model to predict the likelihood of claim severity, achieving an **AUC of 0.78** on a held-out test set.
- Collaborated with business analysts to define model inputs and interpret output predictions for potential use in operational decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
