PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Processed daily trade confirmations for **OTC and non-OTC trades** including Bond, FX, Derivatives, Repos, and Swaps, ensuring ticket completeness and accuracy for a team supporting ~250 active portfolios.
- Monitored the proprietary **trade capture system**, identifying and resolving discrepancies in trade tickets to ensure data integrity before settlement processes.
- Served as the primary escalation contact for settlement queries, liaising with **outsourced back-office support** (State Street) and direct brokers to resolve trade exceptions within tight SLA windows.
- Generated and analyzed various daily **trade-flow reports** and ad hoc requests for the Portfolio Management team, providing insights into trade lifecycle status and potential bottlenecks.
- Collaborated with **Portfolio Managers and Compliance** teams to ensure adherence to trading policies and accurate settlement of financial instruments.
- Managed multiple urgent tasks concurrently under **tight time deadlines**, ensuring timely processing of trades and settlement instructions across different asset classes.
- Containerized internal reporting tools using **Docker** and deployed them to an **AWS EC2** instance, enabling automated report generation and reducing manual effort by approximately 15%.

SKILLS

Trade Processing – OTC trades, non-OTC trades, Bond trades, FX, Derivatives, Repos, Swaps, Trade capture, Confirmation, Settlement, Reconciliation, Trade flow management

Financial Tools & Platforms – Bloomberg, MS Excel, MS Word, MS Outlook, MS Access, MS PowerPoint, MS Outlook

Asset Management Operations – Middle Office, Portfolio Management support, Investment Operations, Compliance, Broker interaction, Back Office support

Programming & Scripting – SQL, Python

Cloud & Containerization – AWS, Docker, EC2

PROJECTS

Trade Reconciliation and Exception Reporting System

- Developed a Python script to automate the reconciliation of trade data between the internal capture system and broker confirmations, identifying and flagging discrepancies for **~5,000 trades per week**.
- Built an automated reporting module using **SQL queries** against a PostgreSQL database to generate daily exception reports, highlighting trades requiring immediate attention for the Middle Office team.
- Designed and implemented a dashboard in **Power BI** visualizing trade exceptions by type and source, enabling the operations team to prioritize resolution efforts and improve settlement efficiency by **18%**.

Automated Trade Data Enrichment Pipeline

- Engineered a data pipeline using **Python and Pandas** to enrich raw trade data with market reference information, supporting downstream analysis for a portfolio management team.
- Integrated the pipeline with **AWS S3** for data storage and retrieval, ensuring secure and accessible storage for historical trade data used in performance analysis.
- Implemented error handling and logging mechanisms within the pipeline, reducing data processing failures by **30%** and improving data quality for critical reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
