PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented control system logic for **industrial automation equipment** using **PLCs** and **DCS** platforms, aligning with client specifications and project timelines.
- Reviewed and provided detailed feedback on **system integrator and vendor design documentation**, ensuring adherence to project requirements and quality standards for automation solutions.
- Managed automation contractors throughout the project lifecycle, from initial selection to final delivery, facilitating communication and resolving technical queries to maintain project momentum.
- Contributed to the selection and configuration of **shop floor hardware**, including **label printers**, **scanners**, and **HMIs**, for various industrial automation deployments.
- Analyzed and documented control system design specifications in collaboration with clients and internal design teams, translating business needs into technical requirements for automation projects.
- Researched and integrated the latest **automation technology trends** by liaising with vendors, ensuring that proposed solutions were current and efficient.
- Participated in **control system hardware and software Factory Acceptance Tests (FATs)**, validating system functionality against design specifications before site deployment.

SKILLS

Automation Systems – PLCs, DeltaV DCS, Industrial Automation Equipment, Control System Design, System Integrators, Vendors

MES/Reporting – PAS-X MES, MES System, Data Historian, OSI PI, RtReports

Shop Floor Hardware – Label Printers, Scanners, Tablets, HMIs

Software & Tools – Python, Java, SQL, Spring Boot, Docker, Linux, Git, Jenkins, Jira, Confluence

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch)

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX

PROJECTS

Industrial Process Control System Design

- Developed control system logic for a pharmaceutical manufacturing line using **Java Spring Boot** and **PostgreSQL**, focusing on precise timing for batch processing.
- Engineered automated data logging to a central **AWS S3** bucket for process parameters, ensuring data integrity for regulatory compliance and reporting.
- Collaborated with the operations team to define and implement alerting mechanisms for critical process deviations, reducing manual oversight needs by **~40%**.

Shop Floor Data Integration and Reporting

- Built **Python scripts** to parse and aggregate data from various **shop floor hardware** (scanners, label printers) into a structured format.
- Developed **Power BI dashboards** to visualize production throughput, quality metrics, and equipment status, providing actionable insights to floor supervisors.
- Implemented automated report generation using **Python and Power Query**, delivering daily performance summaries to management, saving approximately **3 hours** of manual effort per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
