HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and maintained the **Jenkins** CI/CD infrastructure, ensuring high availability and stability for a team of over 50 engineers across multiple projects.
- Automated routine **Jenkins administration** tasks, including plugin updates and job configuration, using **Python scripting**, reducing manual intervention by approximately **30%**.
- Supported the operation of **Jenkins as a production CI service**, systematically triaging build failures and coordinating root cause analysis with development teams, leading to a **15% improvement** in pipeline stability.
- Configured and managed **Jenkins agents** and node lifecycle on **AWS EC2 instances**, optimizing resource utilization and ensuring sufficient capacity for high-volume automated workloads.
- Collaborated with software engineering teams to support and improve their **CI/CD workflows**, troubleshooting pipeline issues and providing guidance on best practices for build and deployment processes.
- Developed and maintained **shell scripts** for system-level troubleshooting and log analysis within **Linux environments**, aiding in faster identification of infrastructure-related issues.
- Contributed to the continuous improvement of CI systems by identifying and addressing infrastructure-related issues, enhancing overall **system reliability** and CI signal quality.

SKILLS

CI/CD – Jenkins, CI/CD concepts, pipeline execution, build automation

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, Kubernetes

Scripting & Automation – Python, Shell scripting

Version Control – Git

Observability & Monitoring – Splunk, Dynatrace

Development Methodologies – Agile, Scrum

PROJECTS

Jenkins CI/CD Pipeline Optimization (HCL Technologies)

- Enhanced **Jenkins pipelines** for multiple enterprise applications, improving build and deployment times by an average of **20%** through parallelization and optimized artifact management.
- Implemented automated monitoring and alerting for **Jenkins infrastructure health** using **Python scripts** and integrated with **Splunk** for proactive issue detection and faster incident response.
- Managed **Jenkins agent scaling** on **AWS EC2**, ensuring efficient resource allocation and cost-effectiveness while supporting peak build loads.

Automated System Health Checks (HCL Technologies)

- Developed a suite of **Python scripts** to automate health checks and diagnostic data collection for critical production systems, reducing manual effort for the support team.
- Integrated **shell scripting** with Python to parse logs and system metrics from **Linux servers**, identifying common failure patterns and providing actionable insights for root cause analysis.
- Containerized diagnostic tools using **Docker** for consistent execution across different environments, simplifying deployment and maintenance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
