HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts to automate infrastructure provisioning and configuration management, reducing manual deployment time by **40%**.
- Implemented monitoring and alerting systems using **Prometheus** and **Grafana** to achieve rapid incident detection and reduce **Mean Time to Respond (MTTR)** by **30%**.
- Managed error budgets and analyzed system performance metrics to balance innovation with reliability goals, ensuring high availability across critical platforms.
- Automated operational tasks, including incident response and log analysis, by writing **Bash** and **Python** scripts, improving system stability.
- Gained strong experience with **Linux/Unix** operating systems through daily use for log analysis, shell scripting, and system administration.
- Collaborated with development teams to enhance service performance and streamline release processes, contributing to more reliable software delivery.
- Containerized applications using **Docker** and deployed them to cloud environments, ensuring consistent and scalable deployments.

SKILLS

Programming Languages – Python, Java, Bash

Cloud Platforms – AWS, Azure

Monitoring & Observability – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch

CI/CD & Automation – Jenkins, Ansible, Terraform, Docker

Operating Systems – Linux/Unix

Databases – PostgreSQL, MySQL, Oracle

Networking – TCP/IP

PROJECTS

Automated Incident Response System (HCL Technologies)

- Engineered an **automated** system in **Python** that ingested alerts from **Splunk** and **Dynatrace**, performing initial triage and creating Jira tickets.
- Reduced manual P1/P2 incident response time by an average of **25 minutes** by automating log aggregation and preliminary root cause analysis.
- Integrated the system with **Jenkins** pipelines to trigger automated rollback procedures for specific deployment failures, enhancing system resilience.

Cloud Infrastructure Provisioning with Terraform (HCL Technologies)

- Developed **Terraform** modules to provision and manage cloud infrastructure on **AWS**, including EC2 instances, S3 buckets, and VPC configurations.
- Implemented **infrastructure-as-code** practices, enabling repeatable and consistent environment deployments and reducing configuration drift by **60%**.
- Containerized core Java Spring Boot services using **Docker** and integrated them into the Terraform deployment process for seamless application-to-infrastructure alignment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
