PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assisted the Customer Operations Manager and Business Support Team with daily operational tasks and workflow monitoring, ensuring adherence to deadlines for query resolution.
- Managed incoming customer and dealer queries via written and telephone channels, providing professional and timely responses to maintain service quality and dealer network relationships.
- Coordinated administrative duties including filing, typing, copying, and scanning, resolving associated administrative problems to support efficient team operations.
- Developed and maintained strong working relationships with nationwide dealer networks and business managers, acting as a key point of contact for customer service support.
- Supported the dealer network and business managers by addressing their inquiries and resolving administrative issues within a fast-paced, team-based environment.
- Managed workflow and ensured timely turnaround on client and dealer queries, contributing to the team's ability to meet service level agreements in a high-pressure setting.
- Contributed to the successful implementation of **new process documentation** for the customer support team, enhancing onboarding efficiency for new hires by approximately **30%**.

SKILLS

PROJECTS

Dealer Inquiry Management System (HCL Technologies)

- Developed a **Python**-based system to track and manage dealer inquiries, categorizing them by type and priority for the operations team.
- Integrated the system with **Jira** for ticket creation and tracking, ensuring all dealer communications were logged and assigned for timely resolution.
- Generated weekly summary reports on inquiry volume, resolution times, and common issues, aiding management in identifying areas for process improvement.

Customer Operations Workflow Optimisation (HCL Technologies)

- Analyzed existing customer support workflows using **process mapping** techniques to identify bottlenecks and areas for efficiency gains.
- Designed and documented an updated workflow for handling written customer queries, incorporating templated responses and escalation paths to reduce average response time by **22%**.
- Facilitated UAT for the new workflow with the operations team, gathering feedback to refine the process before full implementation.
