PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to software development activities for connected healthcare products on the **Devices Software** team, translating technical requirements into functional code.
- Supported the design and development of new product features and enhancements, participating in code reviews and sprint planning sessions.
- Collaborated with **software engineers**, algorithm engineers, and cross-functional stakeholders to understand customer needs and translate them into technical solutions.
- Engineered Python scripts to automate data processing and reporting tasks, reducing manual effort by an estimated **15%** for the operations team.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately **3,500 requests per hour**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring SLA adherence.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time for new environments.

SKILLS

Languages – Python, Java, C++, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Frameworks – Spring Boot

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum

PROJECTS

Connected Device Data Ingestion Pipeline

- Developed a **Python**-based data pipeline to ingest sensor data from connected devices, processing approximately **5,000 events per day**.
- Implemented error handling and logging mechanisms using **AWS Lambda** and CloudWatch, ensuring pipeline reliability and facilitating debugging.
- Designed and built RESTful APIs using **Flask** to expose processed device data for downstream analysis and reporting.

Automated Production Monitoring Dashboard

- Created a **Python** script that aggregated logs from multiple services and generated daily operational reports, reducing manual report compilation by **4 hours per week**.
- Integrated the script with **Jenkins** for scheduled execution, ensuring timely delivery of performance metrics to the engineering team.
- Developed basic data visualization components to represent system health and alert trends, improving visibility for operational stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
