HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Agent Intelligence** for customer-facing AI agents, defining prompts, reasoning logic, and tool calls using **LLM technologies** and the Agentforce platform.
- Architected and built scalable production systems using **JavaScript**, **Python**, and **Apex**, collaborating with other Builders to debug and deploy AI solutions for enterprise clients.
- Partnered with clients to translate complex business challenges into actionable **agentic solutions**, utilizing consultative skills to ensure technology met real-world needs.
- Wrote high-quality code for AI agent development, evaluating **AI outputs** with engineering rigor and contributing to prompt engineering best practices.
- Containerized AI builder services with **Docker** and deployed them to a **Kubernetes cluster** (EKS), configuring resources and implementing basic CI/CD pipelines via Jenkins for predictable rollouts.
- Developed real-time customer impact solutions with leading-edge AI tools like **Cursor** and **Claude**, accelerating development cycles and enabling faster deployment of agentic systems.
- Mentored junior engineers on prompt engineering techniques and the nuances of developing AI agents for enterprise applications, fostering a collaborative learning environment within the builder pod.

SKILLS

AI/ML – AI Builder, Generative AI, LLM, Prompt Engineering, Agentic Solutions, AI Agents, AI Outputs, Vector Databases, Embeddings, Claude, Cursor, Vibes

Languages – Python, JavaScript, Apex, TypeScript, OOP

Backend/API – REST APIs, GraphQL, FastAPI, Flask, Node.js, NestJS

Cloud/DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, EKS, CI/CD, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, SQL

Frameworks/Tools – React, Agentforce Platform, LangChain

Methodologies – Agile, Scrum, Real-Time Infra

PROJECTS

Customer AI Agent Development with Prompt Engineering

- Designed and implemented a customer-facing AI agent framework using **Python** and **FastAPI** to process natural language requests and orchestrate actions via a **vector database**.
- Developed sophisticated **prompt engineering** strategies and tested various LLM models (including concepts similar to Claude) to achieve optimal agent reasoning and tool-use accuracy for a pilot enterprise client.
- Integrated the AI agent with the client's existing systems via **REST APIs**, ensuring seamless data flow and successful execution of automated tasks, reducing manual intervention by an estimated 30%.

AI-Powered Data Analysis and Reporting Pipeline

- Built a data processing pipeline in **Python** using **pandas** and **NumPy** to ingest and clean large datasets from multiple sources for AI model training.
- Developed an **ML model** for predictive analytics on customer interaction data, achieving approximately **0.89 AUC** on a held-out test set of 150,000 records.
- Containerized the pipeline and model serving components using **Docker** for deployment on **AWS Lambda**, enabling scalable and efficient batch processing of data for AI insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
