PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core enterprise services, handling approximately **1,500 requests per minute** during peak hours.
- Designed and implemented data persistence layers using **Hibernate** and **JPA**, optimizing queries that reduced average response times by **22%** for critical data retrieval operations.
- Authored **JUnit** and **Mockito** test suites for Java components, achieving over **85% code coverage** and identifying over **30 critical defects** prior to deployment.
- Engaged with business stakeholders to gather requirements and translate them into technical specifications for new software features, contributing to the successful delivery of **4 major releases**.
- Participated in daily stand-ups, sprint planning, and retrospectives within an **Agile/Scrum** framework, contributing to team velocity and sprint goal achievement.
- Contributed to code reviews and paired programming sessions, mentoring junior engineers and ensuring adherence to established coding standards and best practices.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing build pipelines with **Jenkins** for automated CI/CD.

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java modules into a **Spring Boot microservices** architecture, improving system modularity and maintainability.
- Implemented data access logic using **Hibernate** and **JPA**, ensuring efficient interaction with a **PostgreSQL** database for core business operations.
- Developed comprehensive integration tests with **JUnit** to validate service contracts and data integrity across the new microservices.

Customer Onboarding Automation Tool

- Designed and built a **Python**-based command-line tool to automate the initial configuration and setup for new enterprise customers.
- Integrated with internal APIs to provision necessary resources and validate customer-specific settings, reducing manual setup time by **40%**.
- Developed clear user documentation and ran training sessions for the customer success team on using the new automation tool.
