HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored the health of enterprise applications and production infrastructure using **Splunk** and **Dynatrace**, managing SLAs and responding to P1/P2 incidents.
- Developed **Python** scripts to automate data extraction for scheduled reporting and to streamline ETL processes for operational dashboards.
- Managed change control processes for enterprise systems, coordinating User Acceptance Testing and providing post-go-live support for system configuration updates.
- Analyzed incoming alerts (150-250 per shift) using **Grafana** dashboards and **Zabbix** metrics to perform first-level troubleshooting on **Linux** servers.
- Followed defined runbooks and internal documentation to resolve or escalate system issues, supporting senior administrators during major incidents.
- Gained experience with **Jira** and **Confluence** for defect tracking, ticket management, and collaboration within an Agile/Scrum framework.
- Connected to and navigated remote servers via **SSH**, executing **Bash** scripts for log analysis and routine system maintenance tasks.

SKILLS

Monitoring & Alerting – Zabbix, Grafana, Splunk, Dynatrace, CloudWatch

Operating Systems – Linux, Windows Server

Scripting & Automation – Python, Bash

System Administration – SSH, VPN, Server Navigation, Incident Response

Collaboration Tools – Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Production System Monitoring and Alerting

- Implemented comprehensive monitoring for critical enterprise applications and infrastructure using **Splunk** and **Dynatrace**, ensuring adherence to strict SLAs.
- Developed automated data pipelines with **Python** to extract and transform operational metrics, feeding into custom dashboards for real-time performance analysis.
- Managed incident response protocols, including P1/P2 issue triage and root cause analysis, to minimize system downtime for financial services clients.

Linux Server Administration and Automation

- Performed first-level troubleshooting and issue resolution on **Linux** servers by analyzing alerts from **Zabbix** and **Grafana**, following established runbooks.
- Executed **Bash** scripts to automate routine system administration tasks, including log analysis, file management, and cron job scheduling.
- Gained proficiency in connecting to and navigating remote hosts via **SSH**, supporting the operational stability of distributed systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
