PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed communication channels for customer inquiries, escalating technical issues to internal teams and providing status updates on resolution progress.
- Coordinated the scheduling and execution of mobile device software updates across a fleet of **Android devices** for enterprise clients, ensuring minimal disruption to operations.
- Maintained accurate customer and device records within an internal database, updating spreadsheets and generating **basic reports** on device status and update cycles.
- Assisted customers with **basic Android device setup and configuration**, guiding them through initial setup and common operational tasks over phone and email.
- Developed Python scripts to automate the generation of **weekly operational reports** from disparate data sources, reducing manual compilation time by approximately 6 hours per week.
- Supported enterprise Java applications in production environments, responding to P1/P2 incidents and managing SLAs using **Splunk** and **Dynatrace** for log analysis and performance monitoring.
- Participated in Scrum ceremonies including sprint planning and retrospectives, contributing to team-level estimations and defect tracking using **Jira**.

SKILLS

Customer Support – Customer Communication, Technical Support Escalation, Reporting, Device Configuration, Customer Service

Mobile Devices – Android Devices, Mobile Device Management, Device Setup

Software & Tools – Microsoft Office Suite, Spreadsheets, Jira, Confluence, Splunk, Dynatrace

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

PROJECTS

Enterprise Mobility Management Dashboard

- Developed a Python-based application to track and report on the status of **mobile device updates** for enterprise customers, integrating data from multiple sources.
- Designed and implemented a user interface for managing device configurations and update schedules, incorporating **basic reporting** features to inform operations teams.
- Collaborated with internal technical teams to define requirements for device fleet management, ensuring the dashboard aligned with operational needs and customer support workflows.

Automated Production Support Reporting System

- Engineered Python scripts to aggregate log data from **Splunk** and application metrics from **Dynatrace**, generating daily health reports for production systems.
- Implemented automated data validation checks within the reporting pipeline to identify anomalies and potential issues, flagging around **15 critical alerts** per month for review.
- Created shell scripts to automate the deployment and execution of reporting jobs on a **Linux** environment using cron, ensuring timely delivery of operational insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
