PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Prepared and delivered daily, weekly, and monthly revenue reports for the UK portfolio, focusing on market share, ancillary revenue, and day-of-week performance using **Excel**.
- Analyzed performance data across multiple channels, identifying trends and formulating actionable recommendations for pricing and inventory adjustments, in collaboration with the Revenue Management team.
- Validated and collated data inputs for revenue reports, ensuring accuracy and adherence to established processes, directly supporting the timely delivery of critical business insights.
- Executed weekly rate parity checks across various booking platforms, identifying and investigating discrepancies to ensure competitive pricing and availability for guests.
- Developed and enhanced reporting processes for the UK portfolio, improving consistency and efficiency by approximately **15%** through process refinement and template standardisation.
- Supported Revenue Managers with operational and analytical tasks, including data gathering and preliminary analysis, enabling a greater focus on strategic revenue optimisation.
- Collaborated with cross-functional teams, including Marketing and hotel operations, to align on commercial objectives and share best practices for revenue generation.

SKILLS

Revenue Management – Pricing, Inventory Management, Business Mix Analysis, Rate Parity, Forecasting

Data Analysis & Reporting – Excel, Data Validation, Trend Analysis, Performance Reporting, Commercial Insights

Tools & Technologies – Opera PMS, SQL, VBA, SAS, Microsoft Office Suite

Business Operations – Stakeholder Communication, Process Improvement, Change Management, Hospitality Industry

Analytical Skills – Attention to Detail, Problem Solving, Structured Approach, Constructive Challenge

PROJECTS

Hospitality Revenue Optimisation Dashboard (HCL Technologies)

- Developed an interactive dashboard in **Power BI** to visualise key revenue metrics including occupancy, average daily rate (ADR), and revenue per available room (RevPAR) for a hotel client.
- Implemented complex **DAX** measures to calculate rolling forecasts and segment performance, providing stakeholders with real-time insights into revenue trends.
- Automated data extraction and transformation using **Power Query**, reducing manual data preparation time by an estimated **30%** and ensuring data integrity for reporting.

Guest Stay Data Analysis and Reporting (MSc Data Analytics)

- Performed in-depth analysis on guest stay data using **Python (pandas, NumPy)** and **SQL** to identify patterns in booking behaviour and customer segmentation.
- Built statistical models in **R** to analyse the impact of promotional campaigns on booking volume and revenue, achieving a statistically significant correlation ($p < 0.05$).
- Presented findings and recommendations to academic stakeholders through clear visualisations and a comprehensive report, detailing opportunities for targeted marketing efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
