HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for core service integrations, handling approximately 1,500 requests per minute.
- Developed and maintained **Java persistence layers** using **Hibernate** and **JPA**, optimizing queries to reduce database load by 18%.
- Authored comprehensive **JUnit** test suites and executed **Mockito**-based unit tests for new Java features, achieving over 90% code coverage for critical modules.
- Contributed to the investigation, design, and implementation of new manufacturing processes and technology development within R&D; assignments.
- Participated in **Agile ceremonies**, including sprint planning and technical estimation, ensuring clear communication of task dependencies and effort.
- Debugged and corrected design issues in software modules, applying independent judgment to balance trade-offs and ensure component integrity.
- Containerized applications using **Docker** and deployed to **AWS EC2** instances, managing configurations via **Jenkins** pipelines for automated builds and deployments.

SKILLS

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, CI/CD, Change Management

PROJECTS

Enterprise Java Service Modernization (HCL Technologies)

- Re-architected a critical **Java Spring Boot** microservice responsible for transaction processing, improving request throughput by 30% and reducing p95 latency to under 150ms.
- Integrated **Hibernate** with **PostgreSQL** to manage a growing dataset of financial transactions, developing complex queries for reporting and data validation that supported an 8-person operations team.
- Authored detailed technical documentation and contributed to **JUnit** test case development, ensuring seamless handover of the modernized service to the production support team.

Automated Data Pipeline for Operational Reporting (HCL Technologies)

- Developed a **Python**-based ETL pipeline using **pandas** to extract, transform, and load data from multiple enterprise systems into a central data store for operational dashboards.
- Implemented scheduled data ingestion jobs using cron and shell scripting on **Linux**, processing approximately 50,000 records daily to support near real-time transaction monitoring.
- Collaborated with business analysts to define data requirements and validate report accuracy, ensuring the generated data met the needs of financial operations stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
