HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered Python data pipelines on **AWS Lambda** and **S3** to process and transform large datasets, handling approximately **3,500 events/sec** during peak hours.
- Supported and automated **end-of-day batch jobs** for critical trading workflows, ensuring timely completion and adherence to strict **SLAs**.
- Developed and maintained **Python scripts** for data ingestion, validation, and anomaly detection, reducing manual effort by an estimated **20%**.
- Investigated and resolved discrepancies in derived datasets by tracing issues upstream through the data platform, involving **technical analysis** and cross-team collaboration.
- Provided proactive **production oversight** for trading-critical scheduled jobs, triaging, troubleshooting, and resolving incidents with rapid turnaround.
- Reviewed code and configuration changes, enforcing **safe deployment standards** and coordinating risk-aware releases through **GitLab**.
- Managed and maintained **Linux** server environments, including log analysis, shell scripting for automation, and scheduling tasks with **cron jobs**.

SKILLS

Languages – Python, SQL, Java

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, GitLab, Octopus Deploy, Kubernetes

Data & Analytics – pandas, NumPy, scikit-learn, Power BI, Tableau, R

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Linux, Windows

PROJECTS

Automated Data Onboarding Pipeline

- Engineered a **Python-based pipeline** on **AWS** to automate the ingestion and initial validation of new market data feeds, reducing onboarding time for new datasets by **40%**.
- Implemented data reconciliation checks against reference data sources using **SQL** and **pandas**, identifying and flagging discrepancies for further investigation.
- Developed **scheduled jobs** to process and structure incoming data, preparing it for downstream analytical applications and trading models.

Transaction Anomaly Detection System

- Built a **Python** application to monitor transaction flows, employing **scikit-learn** for anomaly detection on a dataset of approximately **1.5 million records**.
- Developed **REST APIs** using **FastAPI** to serve anomaly scores and facilitate integration with existing operational dashboards.
- Containerized the application using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
