PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained responsive user interfaces for an established platform using **React** and **TypeScript**, enhancing feature usability for enterprise customers.
- Integrated frontend components with backend services via **REST APIs**, ensuring seamless data flow and efficient user interactions.
- Collaborated with cross-functional teams to refine user stories and translate business requirements into technical specifications for new feature development.
- Implemented **SQL** queries for data retrieval and manipulation to support dynamic content rendering and user-specific data presentation on the platform.
- Refactored existing frontend codebase to improve performance and maintainability, reducing load times by an average of **18%** across key pages.
- Participated in code reviews, providing constructive feedback to peers to uphold code quality standards and promote knowledge sharing within the engineering team.
- Containerised frontend applications using **Docker** for consistent development and deployment environments, integrating with **Jenkins** CI/CD pipelines for automated builds and releases.

SKILLS

Frontend – React, TypeScript, HTML5, CSS3, JavaScript, REST APIs

Backend/Databases – SQL, PostgreSQL, Java, Spring Boot

Cloud/DevOps – AWS, Docker, Jenkins, Git

Tools – Jira, Confluence, Splunk, Dynatrace

Analytics – Power BI, Tableau, R, pandas, scikit-learn

Networking – DNS

PROJECTS

Customer-Facing Web Application Enhancement

- Developed interactive UI components in **React** and **TypeScript** for a customer portal, improving user engagement by **22%** based on in-app analytics.
- Integrated new features by consuming **REST APIs** from multiple backend services, ensuring data consistency and real-time updates for end-users.
- Collaborated with product managers to gather requirements for a new reporting module, translating needs into a functional frontend implementation.

Platform Performance Optimization Initiative

- Analyzed and optimized frontend application performance, implementing code splitting and lazy loading techniques that reduced initial load times by **30%**.
- Refactored complex **SQL** queries used for data fetching, improving data retrieval efficiency and reducing backend load.
- Built reusable UI components using **React** and **TypeScript**, establishing a small internal design system to ensure consistency across the platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
