PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed system enhancements for a financial-services operations dashboard, parsing inbound transaction messages to surface alerting for approximately 3,200 failed payments per week.
- Engineered Python scripts for data pipelines and scheduled reporting, automating ETL processes for enterprise business systems and reducing manual effort by 30%.
- Developed and maintained Java Spring Boot REST APIs for cross-service data exchange, incorporating robust error handling and request validation patterns.
- Provided production support for enterprise applications, performing incident response for P1/P2 issues and managing SLAs using **Splunk** and **Dynatrace** observability tools.
- Collaborated with business partners to define and document detailed business requirements for system enhancements, participating in UAT and post-implementation triage.
- Applied **Software Development Life Cycle (SDLC)** and **Project Management Life Cycle (PMLC)** methodologies to complete specific development tasks, ensuring adherence to standard security coding practices.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI, Flask, Plotly Dash, Pytest

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, GitHub

Databases – PostgreSQL, MySQL, Oracle, SQL Server, Redis, Dremio

BI/Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data visualization

Tools/Methodologies – Jira, Confluence, Agile, Scrum, SDLC, PMLC, Splunk, Dynatrace

PROJECTS

Enterprise Java Payments Dashboard Enhancement

- Enhanced a Java Spring Boot-based payments operations dashboard by developing new modules for enhanced transaction monitoring and reconciliation workflows.
- Integrated new data sources via SQL queries across PostgreSQL and Oracle databases to provide a more comprehensive view of payment statuses for operations teams.
- Wrote unit tests using **JUnit** to ensure code quality and stability for all new feature additions, achieving over 85% code coverage for critical components.

Python-Based Data Pipeline Automation

- Developed a Python-based data pipeline to automate the extraction, transformation, and loading (ETL) of financial data from disparate sources into a centralized data store.
- Utilized **pandas** and **NumPy** for data manipulation and cleaning, processing approximately 1.5 million records daily to support operational reporting.
- Implemented scheduled jobs using cron and Jenkins to ensure timely data refreshes, improving report generation speed by 40% for business analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
