PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed user business requirements and system capabilities to translate needs into detailed software specifications for core business applications, including property and financial systems.
- Developed and maintained software solutions and databases by evaluating client needs and analysing requirements, adhering to IT department standards.
- Critically evaluated information from diverse sources, reconciling conflicting details and decomposing high-level needs into actionable technical requirements for development.
- Conducted formal cost/benefit analyses of user business requirements to inform prioritization and strategic decision-making for software development initiatives.
- Confirmed software program operation by conducting rigorous testing cycles and modifying program sequences and code to resolve identified issues.
- Documented and updated policies and procedures for maintaining computer systems and programming guidelines, ensuring adherence to organizational standards.
- Provided comprehensive training to end-users on new and existing core business applications, facilitating user adoption and efficient system utilization.

SKILLS

Core Business Applications – Property Systems, Financial Systems, Database Maintenance, Software Requirements Analysis

Software Development Lifecycle – Requirements Gathering, Software Design, Development, Testing, Code Modification, Documentation

Business Analysis Tools & Techniques – Cost-Benefit Analysis, User Requirements Analysis, Information Reconciliation, Information Decomposition

Communication & Training – Verbal Communication, Written Communication, End-User Training, Policy & Procedure Writing

Programming & Databases – SQL, Java, Python, Spring Boot, PostgreSQL, Oracle, MySQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

PROJECTS

Integrated Financial and Property Management System

- Developed RESTful APIs using **Java Spring Boot** to integrate disparate financial and property management modules, enabling seamless data flow for operational reporting.
- Engineered **SQL** scripts for data migration and validation across **PostgreSQL** and **Oracle** databases, ensuring data integrity for key financial transactions.
- Contributed to the design and implementation of automated reporting workflows using Python scripting, reducing manual report generation time by approximately **30%**.

Business Process Automation Initiative

- Automated a critical **ERP** system reconciliation workflow using **Python** scripts and scheduled tasks, improving accuracy and reducing manual errors by an estimated **22%**.
- Created interactive **Power BI** dashboards to visualize key performance indicators derived from financial and operational data, providing stakeholders with actionable insights.
- Collaborated with business analysts to define requirements and test new automation features, ensuring alignment with operational needs and IT standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
