HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **RESTful APIs** and backend services using **Python** and **Flask**, processing approximately **1,500 requests per minute** to support internal data aggregation workflows.
- Developed and maintained **Java Spring Boot** microservices, focusing on feature enhancements and bug resolutions for an enterprise application suite, including the creation of **new REST endpoints**.
- Engineered **Python ETL scripts** to automate data extraction and transformation from diverse sources, loading into a central PostgreSQL database, reducing manual processing time by **40%**.
- Collaborated with cross-functional teams to define technical specifications for new features, participating actively in **sprint planning** and **code reviews** within an Agile framework.
- Managed and optimized **SQL databases** (PostgreSQL, MySQL) for efficient data storage and retrieval, including schema design and query performance tuning for enterprise systems.
- Containerized backend services using **Docker** for consistent deployment across development and production environments, integrating with **Jenkins** for automated build and deployment pipelines.
- Supported production environments by analyzing logs using **Splunk** and **Dynatrace** to resolve P1/P2 incidents, ensuring adherence to defined SLAs and maintaining system stability.

SKILLS

Backend Development – Python, Node.js, TypeScript, Java, Spring Boot, Flask, FastAPI, RESTful APIs, Microservices

Cloud Platforms – Azure (Azure Functions, Azure App Service, Azure SQL), AWS (EC2, S3, Lambda, CloudWatch)

Databases – SQL Server, MySQL, Azure SQL, PostgreSQL, NoSQL

DevOps & CI/CD – Docker, Kubernetes, Jenkins, Git, GitHub, Azure DevOps

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Postman, Splunk, Dynatrace

PROJECTS

Automated Data Pipeline for Enterprise Reporting

- Developed a **Python**-based data pipeline using **Pandas** and **SQLAlchemy** to ingest and transform data from multiple disparate systems into a unified data warehouse.
- Implemented scheduled data refreshes and validation checks, ensuring data integrity for critical operational reports, processing approximately **500 GB of data** weekly.
- Containerized the pipeline components with **Docker** and configured deployment via **Jenkins**, enabling reliable and repeatable execution on AWS EC2 instances.

Customer Transaction Monitoring Service

- Designed and built a **Java Spring Boot** backend service to process and monitor financial transaction messages, exposing a **REST API** for downstream systems.
- Implemented error handling and alerting mechanisms for failed transactions, contributing to a reduction in manual reconciliation efforts by an estimated **15%**.
- Integrated with a **PostgreSQL** database to store transaction logs and audit trails, ensuring compliance with internal data retention policies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
