PROJECTS

Enterprise Application Observability Platform

- Developed a monitoring solution using **Python** and **AWS CloudWatch** to aggregate logs and metrics from 50+ enterprise applications, enabling proactive detection of performance degradations.
- Created automated alerting mechanisms in **Python** that reduced critical incident response times by **30%** for a team supporting over 20 production environments.
- Configured dashboards in **Splunk** to visualize key application health indicators and SLA compliance for business stakeholders.

Full-Stack Web Application Support & Enhancement

- Troubleshot and resolved complex issues across the full stack of a web application, including debugging **JavaScript** in browser developer tools and optimizing **SQL** queries.
- Implemented new features and bug fixes in **Node.js** backend services and updated **HTML**/**CSS** for the client-facing interface.
- Managed application deployments and configurations on **Linux** servers, ensuring service availability through regular patching and monitoring.
