

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs supporting core business functions, handling approximately 1,500 requests per minute during peak hours.
- Designed and implemented data persistence layers using **Hibernate** and **JPA**, optimizing database interactions for a critical financial services dashboard application.
- Authored **JUnit** and **Mockito** test suites for new Java features, achieving over 85% code coverage and reducing critical bugs by 18% in the release cycle.
- Participated in code reviews for peer engineers, providing constructive feedback on code quality, maintainability, and adherence to architectural standards.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to a payments operations dashboard, translating them into technical specifications.
- Managed and executed system configuration changes through a formal change-control process, coordinating User Acceptance Testing (UAT) for enterprise business systems.
- Deployed containerized applications to **AWS EC2** instances using **Docker**, configuring basic resource limits and network settings for production stability.

SKILLS

Languages – Java, Python, SQL, R, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools/Methodologies – Jira, Confluence, Agile, Scrum, Splunk, Dynatrace, Linux Shell Scripting

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Refactored monolithic Java services into a microservices architecture using **Spring Boot**, improving system scalability and reducing inter-service dependencies.
- Implemented asynchronous communication patterns with **Kafka** and Spring Cloud Stream for event-driven data processing within the financial services domain.
- Enhanced data retrieval performance by optimizing **Hibernate** queries and implementing strategic indexing on PostgreSQL, leading to a 22% reduction in dashboard load times.

Financial Services Transaction Monitoring Dashboard (HCL Technologies)

- Developed backend Java services to ingest and process transaction data from multiple sources for a payments operations dashboard.
- Built RESTful APIs using **Spring Boot** to expose processed transaction data for consumption by frontend applications and reporting tools.
- Integrated with **Splunk** for real-time log analysis and operational alerting on transaction processing errors and system anomalies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
