

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **highly scalable and resilient distributed services** using Java Spring Boot, focusing on **event-driven architecture** patterns to process high-volume transaction data for a financial-services client.
- Developed and maintained **production-ready REST APIs** in Java Spring Boot, integrating with PostgreSQL and Oracle databases to support enterprise business systems and facilitate cross-system data flows.
- Automated operational tasks and data extraction processes using **Python scripting**, reducing manual effort by approximately **15%** for scheduled reporting and ETL workflows within the enterprise systems.
- Managed and troubleshooted **critical production issues** across enterprise Java/.NET applications, responding to P1/P2 incidents within strict SLAs and performing root cause analysis using **Splunk and Dynatrace**.
- Collaborated with product managers and cross-functional teams to design and build **platform-level initiatives**, translating requirements into actionable technical specifications for distributed systems.
- Containerized microservices using **Docker** and deployed them to a **Kubernetes cluster** (EKS), configuring basic resource limits and ensuring predictable rollout for new service versions.
- Wrote and maintained **production runbooks and internal documentation** for the customer onboarding team, which now facilitates bringing new clients live in approximately **10 days**, a significant improvement from previous multi-week timelines.

SKILLS

Backend Languages – Java, Spring Boot, Python, Node.js, Go, Scala, Kotlin

Databases – PostgreSQL, MySQL, Oracle, Cassandra, Elasticsearch, Redis, SQL, NoSQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Messaging & Event Streaming – Apache Kafka

Containerization & Orchestration – Docker, Kubernetes

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, REST APIs

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

PROJECTS

Distributed Event Processing Service (HCL Technologies)

- Engineered a **Java Spring Boot microservice** to ingest and process high-throughput event streams from Apache Kafka, handling approximately **3,500 events per second** during peak hours.
- Implemented robust error handling and retry mechanisms using **Cassandra** for durable storage of failed events, ensuring data integrity and facilitating asynchronous processing for downstream applications.
- Designed and developed **RESTful APIs** for querying processed event data and system status, enabling seamless integration with internal monitoring tools and operational dashboards.

Automated Production Incident Triage System (HCL Technologies)

- Developed a **Python-based automation tool** that integrates with **Splunk and Dynatrace** to automatically correlate alerts and gather preliminary diagnostic data for production incidents.
- Implemented logic to categorize incoming alerts and generate initial incident tickets in **Jira**, reducing manual triage time for the operations team by an estimated **30%**.
- Configured the system to parse and analyze log data, identifying common error patterns and providing actionable insights for faster root cause analysis during P1/P2 events.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
