

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot REST APIs** for core financial services, handling over 5,000 requests per minute during peak hours.
- Implemented data persistence layers using **Hibernate** and **JPA**, managing complex relational schemas across multiple PostgreSQL databases for enterprise business systems.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving 85% code coverage for new feature development within the Java ecosystem.
- Designed and implemented **Python ETL pipelines** to automate data ingestion and transformation for scheduled reporting, processing datasets up to 50 GB daily.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and adhering to strict SLAs for P1/P2 issues.
- Containerized backend Java services using **Docker** and deployed them to **AWS EC2** instances, establishing basic CI/CD workflows with **Jenkins** and Git.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to a payments operations dashboard, contributing to UAT cycles and post-implementation triage.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven

Data Engineering & Scripting – Python, Pandas, NumPy, SQL, PostgreSQL, MySQL, Oracle, ETL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

Monitoring & Observability – Splunk, Dynatrace

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, R, RStudio, Scikit-learn

Enterprise Systems – Jira, Confluence, Agile, Scrum, Change Management

PROJECTS

Enterprise Java Payments Dashboard Enhancement

- Extended a Java Spring Boot application for a financial services client, adding new transaction monitoring endpoints and improving data retrieval performance by **18%**.
- Refactored critical SQL queries in PostgreSQL, implementing advanced indexing strategies that reduced report generation times for reconciliation workflows by an average of **45 minutes**.
- Integrated a new module for operational alerting, parsing inbound transaction messages and surfacing critical status updates to the payments operations dashboard.

Python Automation for ERP Data Extracts

- Developed Python scripts to automate the extraction and formatting of financial data from an ERP system, reducing manual effort for the reporting team by approximately **10 hours per week**.
- Built data validation routines using Pandas to ensure accuracy and consistency of extracted data before loading into downstream analytical platforms.
- Scheduled and monitored data extraction jobs using cron on Linux servers, ensuring timely delivery of essential business intelligence reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
