

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for a financial-services operations dashboard, handling approximately 2,000 transactions per hour and ensuring seamless data exchange between internal systems.
- Implemented robust persistence layers using **Hibernate** and **JPA**, optimizing database interactions for enterprise applications and reducing query latency by an average of 18% across critical data access paths.
- Designed and implemented object-oriented solutions using **Java EE** principles and patterns, including comprehensive unit testing with **JUnit** and mock testing with **Mockito** to ensure code quality and maintainability for core business logic.
- Collaborated with cross-functional teams to refine technical requirements and estimate development effort for new features within an **Agile/Scrum** framework, contributing to sprint planning and backlog grooming.
- Conducted thorough code reviews for peer developers, focusing on adherence to coding standards, performance optimization, and identification of potential bugs, improving overall codebase stability.
- Containerized multiple Java microservices using **Docker**, defining service dependencies and resource configurations for consistent deployment across development, staging, and production environments on **AWS EC2**.
- Managed the full lifecycle of production incidents for enterprise applications, including P1/P2 response, root cause analysis, and implementation of preventative measures, meeting strict SLAs for system availability.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, Spring Cloud, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, Statistical Analysis

PROJECTS

Enterprise Java Application Modernization

- Refactored a monolithic Java application into a microservices architecture using **Spring Boot** and **Spring Cloud**, improving modularity and enabling independent deployment of services.
- Integrated **Hibernate** for data access, optimizing entity mappings and query performance for a dataset exceeding 5 million records, resulting in a 22% reduction in data retrieval times.
- Developed RESTful APIs for inter-service communication and external integrations, ensuring robust error handling and asynchronous processing patterns for critical business workflows.

Financial Transaction Monitoring Dashboard

- Built a **Java Spring Boot** backend service to ingest and process real-time transaction data streams, flagging anomalies for operational monitoring.
- Developed a **PostgreSQL** data model and ETL processes using Python scripts to populate the dashboard's data warehouse with aggregated transaction metrics.
- Created interactive visualizations and reporting capabilities within a **Power BI** dashboard, enabling operations teams to track payment statuses and identify reconciliation issues more effectively.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
