

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built scalable, production-grade systems that leverage **AI** and agentic workflows, accelerating product delivery by applying modern developer tooling.
- Applied **Generative AI** and agentic development patterns to improve engineering productivity across design, coding, testing, and debugging phases.
- Used **AI coding assistants** thoughtfully to accelerate delivery while maintaining strong standards for quality, security, and reliability.
- Partnered with product, data science, and engineering teams to translate ideas into production-grade solutions with clear business impact.
- Drove technical innovation by evaluating emerging tools, frameworks, and engineering practices, identifying opportunities for differentiated value.
- Collaborated across engineering, product, and AI teams to enable faster experimentation and responsible scaling of AI-enabled solutions.
- Containerized backend services using **Docker** and deployed them to **Kubernetes** clusters on **AWS**, managing configurations and resource allocation.

SKILLS

AI/ML – Generative AI, Agentic design patterns, AI system design, Prompt management, Context management, Memory patterns, Evaluation, AI safety controls, Inference APIs, Embeddings, Retrieval-augmented generation

Backend Languages – Java, Python

Cloud & Orchestration – AWS, Kubernetes, Docker

Architecture & Patterns – Distributed systems, Event-driven architectures, Data pipelines, Enterprise integration patterns, APIs

AI Frameworks & Tools – LangChain, SDKs, AI engineering assistants

Development Lifecycle – CI/CD, Automated testing, Observability, Release engineering, Operational support

PROJECTS

Agentic Workflow Platform for Engineering Productivity

- Developed a platform utilizing **LangChain** and vector databases to enable agentic workflows for code generation and documentation assistance.
- Integrated **Python**-based AI assistants into the CI/CD pipeline, reducing code review turnaround time by an average of **30%** for development teams.
- Designed and implemented prompt engineering strategies and context management for LLM interactions, improving the relevance and accuracy of generated code snippets.

AI-Assisted API Development Framework

- Built a **Java Spring Boot** framework that integrates with AI coding assistants to accelerate the development of RESTful APIs.
- Implemented reusable components and patterns for common API tasks, enabling developers to generate boilerplate code and focus on core business logic.
- Containerized the framework services using **Docker** for consistent deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
