

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Java applications, focusing on backend services and REST API implementations within the Spring Boot framework.
- Wrote clean, efficient, and reusable Java code for feature development and bug fixes, adhering to established coding standards and design patterns.
- Integrated Python scripts to automate data processing tasks and scheduled reporting, improving efficiency for operational workflows.
- Tested and debugged applications using JUnit and other testing tools to ensure software quality and identify defects proactively.
- Collaborated with cross-functional teams, including operations and business analysts, to gather requirements and support user acceptance testing for enterprise systems.
- Fixed bugs and improved existing software features by analyzing reported issues and implementing targeted code enhancements.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations via **Jenkins** pipelines.

SKILLS

Languages – Java, Python, SQL, HTML, CSS, JavaScript

Frameworks – Spring Boot

Databases – MySQL, PostgreSQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools & Methodologies – Jira, Confluence, Agile/Scrum

PROJECTS

Enterprise Java Application Enhancement

- Developed new RESTful APIs using **Java Spring Boot** to support integration with downstream enterprise systems, handling approximately 1,500 requests per hour.
- Refactored legacy Java code sections to improve maintainability and reduce complexity, leading to a 15% decrease in bug reports for the affected modules.
- Implemented unit tests with **JUnit**, achieving over 80% code coverage for critical API endpoints and ensuring adherence to design specifications.

Automated Reporting and Data Processing

- Created **Python** scripts to automate the extraction, transformation, and loading (ETL) of data from transactional databases into a reporting schema, processing around 50,000 records daily.
- Developed scheduled jobs using cron and shell scripting to execute data pipelines, ensuring timely delivery of operational reports to business stakeholders.
- Wrote complex **SQL** queries for data validation and ad-hoc analysis, supporting the reconciliation of financial transaction data across multiple systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
