

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for enterprise financial applications, building **RESTful APIs** to support distributed system architecture.
- Implemented complex business logic and bug fixes within existing **Java Spring Boot** services, ensuring adherence to coding standards and system stability.
- Engineered efficient data persistence layers using **Hibernate** and **JPA** with **PostgreSQL**, optimising queries to improve application performance by approximately **18%**.
- Contributed to technical design discussions, evaluating architectural proposals and providing input on solution scalability and maintainability for new feature development.
- Participated actively in **Agile ceremonies**, including sprint planning and daily stand-ups, estimating effort and collaborating on task breakdown for team deliverables.
- Mentored two junior engineers on Java development best practices and effective debugging techniques, improving their code quality and understanding of the codebase.
- Containerised multiple **Java Spring Boot** applications using **Docker**, deploying them to an **AWS EKS** cluster and configuring basic resource limits for improved stability.

SKILLS

Languages – Java, Python, SQL, JavaScript, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, Spring Cloud, JUnit, Mockito, Flask, FastAPI, scikit-learn, pandas, NumPy

Cloud/DevOps – AWS (EKS, EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Databases – PostgreSQL, Oracle, MySQL, Kafka

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Linux

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Microservice Architecture Refactor

- Refactored a monolithic Java application into a set of scalable **microservices** using **Spring Boot**, enhancing system resilience and enabling independent deployment cycles.
- Developed robust **RESTful APIs** for inter-service communication and integrated them with **Kafka** for asynchronous event processing, handling an average of **2,500 events** per minute.
- Implemented comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical service components.

Financial Transaction Processing System Enhancement

- Enhanced a Java-based transaction processing system by integrating **JPA** with **Oracle**, optimising data retrieval and update operations for financial records.
- Developed new API endpoints in **Java Spring Boot** to support enhanced reporting capabilities, providing stakeholders with access to near real-time transaction data.
- Supported the deployment of updated service versions via **Jenkins** pipelines, ensuring seamless transitions with minimal disruption to ongoing operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
