

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for core ad exchange platform features, processing ~2,500 requests per second during peak hours.
- Designed and implemented **Hibernate/JPA** entities and complex queries for a relational data store, ensuring data integrity for user profiles and ad campaign configurations, reducing query load by **18%**.
- Engineered **JUnit** and **Mockito** test suites for critical Java components, achieving over **85%** code coverage and reducing post-deployment defects by **22%**.
- Participated actively in **code reviews** for a team of 5 engineers, identifying potential issues and ensuring adherence to coding standards and system security requirements.
- Owned production system health for key microservices, monitoring dashboards using **Splunk** and **Dynatrace**, and actively participating in incident resolution workflows to address P1/P2 issues.
- Collaborated with Engineering Managers and Product Owners in **Agile ceremonies**, contributing to sprint planning and providing technical estimations for new feature development.
- Containerized multiple **Java applications** using **Docker** and deployed them to a **Kubernetes** cluster (EKS), managing configurations and basic resource allocation.

SKILLS

Languages – Java, Go, Python, SQL, R, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, FastAPI, Flask, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Observability – Splunk, Dynatrace

BI/Analytics – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

High-Throughput Ad Exchange Service (Java)

- Developed a **Java Spring Boot**-based microservice responsible for routing and bidding in an ad exchange, handling over 1,500 requests per second.
- Integrated with a **PostgreSQL** database using **Hibernate** to store and retrieve real-time bid request data and campaign targeting parameters.
- Wrote comprehensive unit and integration tests with **JUnit**, achieving **90%** code coverage and ensuring service stability during high-load scenarios.

Real-Time Analytics Pipeline (Python)

- Built a **Python** data pipeline using **pandas** and **NumPy** to process and aggregate real-time ad impression logs, transforming raw data into actionable insights.
- Developed a **FastAPI** service to expose aggregated metrics, serving data for an internal reporting dashboard and reducing data retrieval times by **30%**.
- Deployed the pipeline components as **Docker** containers managed via basic orchestration scripts, ensuring consistent execution across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
