

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained scalable backend systems using **Java** and **Spring Boot**, focusing on microservices architecture for new feature development.
- Designed and implemented **REST APIs** with Spring Boot, ensuring robust data structures and adherence to backend best practices for cross-service communication.
- Collaborated with a remote team to review technical specifications and deliver high-quality, maintainable code within an Agile framework.
- Participated in code reviews, providing constructive feedback to peers to uphold coding standards and improve overall application quality.
- Troubleshoot, debugged, and optimized backend systems, resolving production issues to enhance application performance and reliability.
- Documented technical processes and solutions through clear, concise written communication, aiding knowledge transfer within the engineering team.
- Deployed containerized Java applications to **AWS EC2** instances, managing configurations and basic resource allocation.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

Methodologies – Agile, Scrum, Microservices Architecture, REST APIs

PROJECTS

Enterprise Java Backend Service Development

- Engineered a **Java Spring Boot** microservice to handle core business logic for an internal platform, processing approximately 1,500 requests per hour.
- Implemented **Hibernate** for data persistence, mapping complex domain objects to a **PostgreSQL** relational database and optimizing query performance.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over 85% code coverage for critical service components.

Scalable API for Data Ingestion

- Built a **Python Flask** API to receive and process data streams from external sources, designed to handle fluctuating traffic patterns.
- Integrated the API with **AWS S3** for temporary data staging before batch processing, ensuring data durability and availability.
- Containerized the API using **Docker** for consistent deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
