PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, developed, and maintained core Java Spring Boot microservices responsible for API gateway functions and request routing, handling approximately **5,000 requests per minute**.
- Implemented Hibernate ORM mappings and optimized SQL queries for a critical data persistence layer, reducing average query execution time by **18%** on core transaction processing tables.
- Authored comprehensive JUnit and Mockito test suites for new Java features, achieving and maintaining over **90% code coverage** for critical business logic modules.
- Collaborated with a distributed team of 6 engineers on design discussions and code reviews for new Lambda control plane features, contributing to architectural decisions for scalability.
- Optimized system performance and latency for a high-throughput API service by implementing caching strategies and asynchronous processing patterns, reducing p95 latency by **150ms**.
- Participated in a 4-person on-call rotation, responding to and resolving production incidents within defined SLAs, and contributing to post-incident reviews for service reliability improvements.
- Containerized microservices using **Docker** and managed deployments on an **AWS EKS** cluster, configuring basic resource limits and health checks for improved stability.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Databases – PostgreSQL, MySQL, Oracle

Tools/Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, REST APIs, Fastapi

Data Analytics/BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Java-based Serverless Orchestration Service

- Developed a **Java Spring Boot** application acting as a control plane orchestrator, managing the lifecycle and configuration of serverless functions across multiple AWS accounts.
- Integrated with AWS Lambda APIs using the **AWS SDK for Java** to provision, update, and monitor function deployments, ensuring consistent state across environments.
- Implemented robust error handling and retry mechanisms, reducing failed function deployments by **22%** through improved idempotency and state management.

Distributed Systems Performance Analysis Tool

- Built a **Python**-based tool to collect and analyze performance metrics from distributed Java applications running on AWS EC2 instances.
- Designed data ingestion pipelines using **pandas** and **NumPy** to process logs from **Splunk** and **CloudWatch**, identifying performance bottlenecks and latency spikes.
- Generated reports and visualizations using **Matplotlib** that highlighted critical performance regressions, aiding engineering teams in root cause analysis for production issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
