PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices to support internal ML tooling, focusing on efficient data ingestion and feature retrieval for downstream model training.
- Developed **Python** scripts to automate data pipeline execution and scheduled reporting, processing an average of 15,000 records daily for operational analytics.
- Contributed to the development of **Java** REST APIs for cross-service communication, ensuring robust error handling and adherence to established design patterns.
- Participated in **code reviews** and mentored junior engineers on best practices for building scalable and maintainable software within the team.
- Collaborated with product managers and principal engineers to define technical requirements and estimate effort for new feature development cycles.
- Championed operational improvements by identifying and addressing bottlenecks in the CI/CD pipeline, reducing average deployment time by **20%**.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, managing configuration and basic resource allocation.

SKILLS

Languages – Python, Java, SQL, R, Bash

Frameworks/Libraries – Spring Boot, scikit-learn, pandas, NumPy, Hibernate, JPA, FastAPI

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch, EKS), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Concepts – System Design, Network Fundamentals, Machine Learning, Data Analytics, CI/CD, Agile/Scrum

PROJECTS

ML Model Training Pipeline Orchestration

- Engineered a **Python**-based pipeline using **FastAPI** to orchestrate the training of machine learning models, integrating data preprocessing and hyperparameter tuning stages.
- Developed a feature extraction module that processed ~1.2M transaction records, creating behavioural features for a fraud detection model, achieving an **AUC of 0.82** on held-out data.
- Containerized the entire training pipeline with **Docker**, enabling consistent execution across development and staging environments on **AWS EC2**.

Automated Network Device Configuration Management

- Built **Python** scripts to automate the deployment and validation of network device configurations, reducing manual intervention by **40%**.
- Integrated with network device APIs to fetch operational status and log key metrics, providing data for a custom dashboard built with **Pandas** and basic plotting libraries.
- Managed configuration templates and version control using **Git**, ensuring auditability and rollback capabilities for all network changes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
