PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **distributed data services** for a large-scale analytics platform, processing approximately **3,500 events per second** during peak hours.
- Developed **Python data pipelines** for ETL, ingesting and transforming data from various sources into a centralized data lake on **AWS S3**.
- Engineered **Java Spring Boot REST APIs** to expose processed data for downstream analytics and reporting applications, handling complex business logic.
- Collaborated with business and engineering partners to gather **analytical workflow requirements** and translate them into technical specifications for new data platform features.
- Integrated **Generative AI capabilities**, including prompt engineering for LLM interactions, to enhance data accessibility and generate actionable insights.
- Authored **production runbooks** and provided on-call support for critical data platform services, contributing to a **98.5% service availability**.
- Containerized data processing applications using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations and basic resource allocation.

SKILLS

Programming Languages – Python, Java, SQL, Scala

Cloud Platforms & Services – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Data Technologies – BigQuery, Snowflake, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL

AI & Machine Learning – Generative AI, LLMs, Prompt Engineering, ML Concepts

Development Tools & Practices – RESTful API Development, Docker, Kubernetes, Git, Jenkins, TDD, Agile

BI & Analytics – BI Concepts, Data Visualization

PROJECTS

Scalable Data Platform for Business Insights

- Architected and built a **distributed data system** on **AWS** to support enterprise-wide analytics, handling terabytes of data daily.
- Developed **Python ETL pipelines** to integrate data from disparate sources, transforming and loading it into a managed **data warehouse**.
- Implemented **RESTful APIs** using **Java Spring Boot** for querying aggregated data, enabling business users to access critical insights through dashboards.

Generative AI-Enhanced Data Querying Service

- Designed and developed a service that integrates **LLMs** for natural language querying of structured data, translating user prompts into **SQL** queries.
- Implemented **prompt engineering** techniques to optimize the accuracy and relevance of AI-generated responses for complex analytical questions.
- Deployed the service using **Docker** on a cloud platform, ensuring scalability and reliable access for internal data consumers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
