PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable back-end web services using **Java Spring Boot**, handling approximately **3,500 events/sec** during peak hours for internal financial transaction processing.
- Improved and evolved **Python**-based automation tools and ETL workflows for data ingestion and scheduled reporting, reducing manual processing time by an estimated **20%**.
- Partnered cross-functionally with enterprise client operations teams to troubleshoot and resolve complex system and integration issues on a **payments operations dashboard**, maintaining service level agreements.
- Contributed to architecture decisions for a **Java Spring Boot** microservice, including implementing robust error handling and **REST API** contracts for inter-service communication.
- Containerized a **Java Spring Boot** application using **Docker** and deployed it to an **AWS EC2** instance, managing CI/CD pipelines via **Jenkins** for automated builds and deployments.
- Executed change-control management for enterprise business systems, coordinating UAT and providing post-go-live support for system configuration updates across interconnected platforms.
- Wrote production runbooks and internal documentation for a critical **financial-services dashboard**, enabling faster incident response and reducing mean time to resolution by approximately **15%**.

SKILLS

Backend Services – Java, Spring Boot, REST APIs, Microservices, Python, Flask, FastAPI, Node.js, NestJS, Ruby on Rails, Django

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Databases & Data – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, pandas, NumPy, scikit-learn

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, Statistical Analysis, Machine Learning Fundamentals

Domain & Methodologies – Agile, Scrum, Localization, Internationalization, Translation Workflows, GDPR, Change Management

PROJECTS

Enterprise Java Application Modernization

- Refactored a monolithic **Java** application into a set of microservices using **Spring Boot**, improving system modularity and enabling independent deployment cycles.
- Implemented **JPA** and **Hibernate** for data persistence, optimizing database interactions and reducing query execution times by **30%** across key entities.
- Developed **RESTful APIs** for cross-service communication, ensuring consistent data exchange and integrating with external systems via defined contracts.

Automated Transaction Monitoring Pipeline

- Engineered a **Python**-based ETL pipeline to process and monitor high-volume financial transaction data from multiple sources, handling approximately **2,800 messages per hour**.
- Developed automated alerts and reporting mechanisms using **pandas** and scheduled **Python** scripts, providing operational teams with near real-time insights into payment flow exceptions.
- Integrated the pipeline with **PostgreSQL** for data staging and validation, ensuring data integrity and supporting ad-hoc analysis for reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
