PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Reviewed and validated map data for business information accuracy against client policies, ensuring adherence to **global standards** for over 1,500 business listings weekly.
- Engaged with business owners via outbound calls to verify and update critical business information, successfully confirming details for approximately **90%** of assigned accounts within a 24-hour window.
- Executed data updates on client platforms based on verified information, maintaining a **98% data integrity** rate for all modifications during the reporting cycle.
- Made well-balanced decisions regarding map data accuracy by applying market-specific knowledge and cross-referencing information sources, resolving over **50 complex cases** per week.
- Managed multiple client platforms and data streams simultaneously, effectively multi-tasking to meet daily deadlines and maintain service level agreements in a **fast-paced environment**.
- Collaborated with international teams to gather requirements and feedback on data accuracy issues, contributing to process improvements that reduced **information discrepancies by 15%**.
- Developed and maintained shell scripts on Linux to automate data extraction and initial validation, reducing manual processing time by **~30%** for recurring reports.

SKILLS

Languages – English (B2/C1), French (B2/C1), German (B2/C1)

Core Competencies – Customer Service, Data Validation, Business Information Accuracy, Decision Making, Multi-tasking, Time Management, Prioritization, Attention to Detail, Written and Oral Communication

Tools & Platforms – Client Platforms (Proprietary), Google Maps Data, Data Verification Tools

Technical Skills – SQL, Python, Linux Shell Scripting, Data Analysis, ETL, REST APIs

Methodologies – Agile, Scrum

PROJECTS

Global Business Data Verification Platform

- Developed a Python-based application to ingest and process business data from multiple global sources, enabling consistent verification workflows.
- Implemented data validation rules using SQL and Python to flag inconsistencies and anomalies, improving the accuracy of business information by an estimated **20%** for a pilot dataset.
- Designed a simple reporting module that provided stakeholders with daily summaries of verified businesses and outstanding verification tasks, supporting a team of 8 analysts.

Customer Data Enrichment and Platform Update Automation

- Automated the process of updating client platforms with verified business information using Python scripts and interacting with platform APIs.
- Reduced the manual effort required for data entry by approximately **40%**, allowing the operations team to focus on higher-value verification tasks.
- Integrated basic logging and error handling into the automation scripts to ensure reliable execution and facilitate troubleshooting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
