PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Monitored and managed a high-volume data center network infrastructure ticket queue, acknowledging and processing alerts within defined **Service Level Agreements (SLAs)**.
- Performed fault isolation and initial troubleshooting for **Layer 1-3 network issues** across routing and switching devices, documenting all steps in the **ServiceNow ticketing system**.
- Coordinated with on-site **smart hands teams** and remote network equipment vendors to diagnose and resolve hardware and configuration-related incidents, minimizing service disruption.
- Followed documented **Methods of Procedure (MOPs) and Standard Operating Procedures (SOPs)** to ensure consistent and effective incident response and resolution workflows.
- Authored and refined **operational runbooks** for common network failure scenarios, contributing to a **15% reduction** in average incident resolution time for the NOC team.
- Developed Python scripts to automate the generation of daily network health reports and extract key metrics from **Splunk** logs, improving team efficiency by **~20%**.
- Participated in **Agile/Scrum ceremonies**, including sprint planning and retrospectives, to identify areas for process optimization and continuous improvement within the support operations.

SKILLS

Networking Fundamentals – IP addressing, VLANs, routing, switching, Layer 1-3 troubleshooting

Network Monitoring & Ticketing – SolarWinds, Nagios, PRTG, ServiceNow, Jira, Splunk, Dynatrace

Operating Systems & Scripting – Linux, Shell Scripting, Python, Bash

Cloud & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Development & CI/CD – Java Spring Boot, REST APIs, Jenkins, Git

PROJECTS

Automated Network Health Monitoring Dashboard (HCL Technologies)

- Developed a Python-based application to ingest network device status data from multiple monitoring tools (e.g., **Nagios, PRTG**) into a central PostgreSQL database.
- Built interactive **dashboards using Power BI** to visualize network health metrics, including device availability, latency, and packet loss, presenting insights to operations teams.
- Created automated reports summarizing daily network performance and alert trends, enabling proactive identification of potential infrastructure issues and reducing manual reporting effort by **~30%**.

Incident Response Automation Scripting (HCL Technologies)

- Wrote Python scripts to parse and correlate alerts from **Splunk and Dynatrace**, automating the initial triage of P1/P2 incidents within the financial services operations dashboard.
- Implemented automated ticket creation and assignment in **Jira** based on alert severity and type, ensuring faster incident acknowledgment and reducing manual ticket management overhead.
- Designed shell scripts for log collection and basic diagnostics on **Linux** servers, streamlining the data gathering process for incident analysis teams and reducing data collection time by **~40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
