PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and reconciled voluntary and mandatory corporate action events across EMEA markets, ensuring timely execution within strict deadlines for a portfolio of ~500 distinct event types annually.
- Executed elections for corporate actions, calculating and booking entitlements for diverse business units and performing post-payment reconciliations of stock and cash accounts.
- Provided direct client services to trading desks and internal business units, resolving queries and maintaining clear communication channels regarding corporate action status and entitlements.
- Collaborated with Inventory Management Desk, Swaps, Stock Loan, and Prime Brokerage teams to manage positions and recover funds from external counterparties, monitoring outstanding balances effectively.
- Participated in project initiatives focused on enhancing operational efficiency and risk management within the Asset Services department, contributing to process improvements.
- Investigated and resolved complex queries from key stakeholders, including trading desks and operational teams, by analyzing transaction data and cross-referencing system records.
- Containerized Java Spring Boot applications for deployment to an **AWS** environment, managing EC2 instances and ensuring proper configuration for service availability.

SKILLS

Core Competencies – Corporate Actions, Client Servicing, Stakeholder Management, Risk Management, Reconciliations, Data Analysis, Problem Solving, Communication

Banking & Financial Services – Asset Services, EMEA Markets, Trading Desks, Prime Brokerage, Stock Loan, Swaps, Financial Operations

Data Handling & Analysis – Data Collection, Data Entry, Transaction Monitoring, Reconciliation Workflows, SQL, Power BI

Programming & Scripting – Java, Spring Boot, Python, SQL

Cloud & Infrastructure – AWS, EC2, Docker, Linux

Project Management & Tools – Jira, Confluence, Agile Methodologies, Change Management

PROJECTS

Corporate Actions Election Management System

- Developed a Java Spring Boot application to track and manage voluntary and mandatory corporate action elections for EMEA markets, integrating with internal databases.
- Implemented reconciliation logic to compare calculated entitlements against actual booked positions, identifying discrepancies and flagging them for investigation, reducing manual reconciliation effort by ~30%.
- Designed a RESTful API to provide real-time election status updates to various trading desks and operational teams, improving transparency and reducing query volume.

Payment Reconciliation Automation Tool

- Created a Python script to automate the reconciliation of stock and cash accounts post-payment for corporate action entitlements, processing approximately **1,500** transactions per batch.
- Developed data validation checks within the script to ensure accuracy and completeness of financial data before booking, catching over **95%** of data entry errors.
- Integrated the script with existing reporting tools to generate daily reconciliation summaries for the operations team, enhancing visibility into outstanding balances.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
