PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed a portfolio of **voluntary and mandatory corporate action events** across EMEA markets, processing over **1,200 events** per quarter under strict deadlines.
- Reconciled and calculated **corporate action entitlements** for multiple business units, including post-payment reconciliations of stock and cash accounts to ensure accuracy.
- Investigated and resolved an average of **15-20 complex queries** per week from key stakeholders, including trading desks and inventory management, maintaining a **95%** first-contact resolution rate.
- Collaborated with colleagues in global Asset Services teams (London, US, Asia) to ensure consistent execution of corporate action processes and shared knowledge transfer.
- Participated in **project initiatives** aimed at improving operational efficiency and risk management within the Asset Services department, contributing to process documentation.
- Managed **outstanding balances** and recovered funds from external counterparties, ensuring timely settlement and adherence to risk thresholds set by senior management.
- Developed **Python scripts** to automate the generation of daily reconciliation reports for corporate action entitlements, reducing manual effort by approximately **4 hours** per week.

SKILLS

Domain Knowledge – Banking, Financial services, Corporate actions, Asset services, EMEA markets, Voluntary corporate actions, Mandatory corporate actions, Trade lifecycle.

Client Servicing & Communication – Client services, Stakeholder management, Relationship management, Oral communication, Active listening, Query resolution, Professional engagement, Responsiveness.

Project Management & Execution – Task prioritization, Deadline management, Multiple deliverables, Risk management, Change management, Process improvement, Project initiatives, Data collection, Data entry.

Technical Skills – SQL, Python scripting, Data reconciliation, Automation, Reporting, REST APIs, Jira, Confluence.

Analytical & Problem Solving – Analytical thinking, Attention to detail, Problem resolution, Business acumen, Informed decision-making, Data analysis, Trend analysis.

PROJECTS

Corporate Actions Data Reconciliation System (HCL Technologies)

- Developed a **Python-based system** to automate the reconciliation of corporate action entitlements against financial statements, handling over **1,000 transaction records** daily.
- Implemented **SQL queries** against PostgreSQL to extract and validate transaction data, ensuring data integrity and flagging discrepancies for operational review.
- Created automated reports using **Pandas** detailing reconciliation status and identified exceptions, which were used by the operations team to streamline manual review processes.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Contributed to the enhancement of a **financial-services operations dashboard** by implementing new data pipelines using **Java Spring Boot** to process transaction flow monitoring data.
- Designed and developed **REST APIs** to feed real-time operational alerts into the dashboard, improving visibility for the finance client on failed payment messages.
- Supported production deployment and monitoring of dashboard components on **AWS EC2** instances, ensuring stability for critical operational workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
