PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for data exchange between enterprise systems, integrating with **PostgreSQL** databases and ensuring adherence to API design best practices.
- Developed and maintained efficient data pipelines using **Python** and **pandas**, processing approximately 50,000 records daily to support automated reporting and data validation workflows.
- Managed production support for critical enterprise applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**, consistently meeting SLA targets.
- Assisted in the development and optimization of medical device components, translating engineering specifications into tangible designs and selecting appropriate materials and processes.
- Authored comprehensive technical documentation, including work instructions, standard operating procedures (SOPs), and validation protocols, to support product development and regulatory compliance.
- Performed hands-on laboratory testing and engineering evaluations for device components, including development unit testing and simulated use scenario analysis.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations through **Jenkins** CI/CD pipelines for streamlined development and deployment cycles.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum, Design of Experiments (DOE), IQ/OQ/PQ

Domain Knowledge – Medical Device Development, Process Development, Technical Documentation, Test Method Development

PROJECTS

Medical Device Component Design & Validation

- Designed and prototyped key components for a new medical device, focusing on material selection and manufacturability to meet stringent performance requirements.
- Developed and executed a series of engineering tests, including stress and functional testing, to validate component performance against design specifications, documenting results in detailed reports.
- Collaborated with cross-functional teams, including Quality Assurance and Operations, to ensure designs met regulatory standards and production readiness.

Automated Data Processing Pipeline (HCL Technologies)

- Engineered a **Python**-based ETL pipeline to ingest, transform, and validate large volumes of transaction data from multiple sources, processing approximately 40,000 records per day.
- Implemented data quality checks and reconciliation logic within the pipeline using **pandas** and **SQL**, reducing data discrepancies by 15% for downstream reporting.
- Automated the scheduling and execution of the data pipeline using cron jobs on **Linux**, ensuring timely delivery of processed data for operational dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
