PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered and deployed **Python** scripts to automate ETL processes for data ingestion into analytical databases, reducing manual processing time by approximately **40%**.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling core business logic and data persistence operations.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict SLA timelines using **Splunk** and **Dynatrace**.
- Built and enhanced **Java** applications focusing on object-oriented design principles and utilizing **JUnit** for unit testing to ensure code quality.
- Integrated **Hibernate** with PostgreSQL databases to manage complex data relationships and optimize query performance for backend services.
- Designed and implemented **Python** feature pipelines on **AWS Lambda**, processing approximately **3,500** events per second to feed downstream ML models.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Python, Java, SQL, R, English

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, FastAPI, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum

PROJECTS

AI-Powered Customer Experience Transformation Engine

- Developed **Python** feature pipelines to extract behavioural signals from user interaction data, feeding into a predictive model for personalized content delivery.
- Trained a **scikit-learn** classification model on a dataset of **~250,000** user sessions to identify engagement patterns, achieving an F1-score of **0.78**.
- Deployed the trained model as a **FastAPI** microservice on **AWS Lambda**, providing real-time inference for product recommendation features used by enterprise customers.

Real-time Transaction Anomaly Detection System

- Built a **Java Spring Boot** application to ingest and process high-volume transaction data streams, focusing on low-latency processing.
- Implemented asynchronous processing using **JPA** and **PostgreSQL** to handle reconciliation workflows and identify discrepancies in financial operations.
- Integrated monitoring tools to track system performance and application health, ensuring reliable operation for financial services stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
