PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed predictive models using **scikit-learn** on a ~300,000-record dataset to identify trends in animal health data, achieving an **AUC of 0.89**.
- Designed and implemented Python data pipelines for ETL processes, transforming raw data from diverse sources into a structured format for analysis, handling approximately **5,000 records per hour**.
- Collaborated with cross-functional teams to gather business requirements for AI initiatives, translating them into technical specifications for data science solutions.
- Contributed to the development of interactive dashboards in **Power BI**, enabling stakeholders to visualize key performance indicators and gain actionable insights.
- Assisted in the evaluation and integration of emerging AI technologies, including exploring foundational concepts of **generative AI** and large language models.
- Supported the development of data pipelines and AI models, ensuring data quality and model governance best practices were followed.
- Containerized Python applications using **Docker** and deployed them to **AWS EC2** instances, managing infrastructure and ensuring application availability.

SKILLS

Programming Languages – Python, R, SQL

Data Science & ML – Machine Learning, AI, Predictive Modelling, scikit-learn, TensorFlow, PyTorch, NLP, Generative AI, LLMs, Prompt Engineering

Data Visualization – Power BI, Tableau

Cloud Platforms – AWS, Azure, GCP

Databases & Data Pipelines – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Data Governance, Model Governance

Tools & Methodologies – Git, Docker, Kubernetes, Jenkins, Agile, Scrum, Data Analysis, Statistical Analysis

PROJECTS

Animal Health Data Analysis Platform

- Developed a comprehensive data analysis platform using **Python** and **Pandas** to process and analyze large datasets related to animal health trends.
- Built predictive models with **scikit-learn** to identify patterns in disease outbreaks, achieving an **accuracy of 92%** on historical data.
- Created interactive dashboards in **Power BI** to present analytical findings to business stakeholders, facilitating data-informed decision-making.

AI-Driven Operational Efficiency Initiative

- Engineered Python scripts to automate data ingestion and pre-processing for AI model training, significantly reducing manual effort.
- Explored and implemented foundational concepts of **generative AI** for potential use cases in automating report generation.
- Collaborated with domain experts to define requirements and integrate AI-driven insights into existing operational workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
