PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided first-line technical support for depot staff reporting issues with onboard bus equipment, including ticket machines, location tracking, and communication devices.
- Carried out basic troubleshooting steps such as device restarts, configuration updates, and status reviews, to resolve immediate issues and minimize service delays.
- Logged all reported equipment issues meticulously in the dedicated **ServiceNow** ticketing system and escalated complex problems to central support teams.
- Performed checks and basic repairs on ticket machines, including updating software and ensuring revenue data uploads, to maintain operational readiness.
- Managed the inventory of spare onboard equipment, including replacing faulty ticketing units and SIM cards, while maintaining accurate asset logs.
- Assisted with the testing of new software updates on onboard devices and executed system resets as required to ensure smooth functionality.
- Conducted regular health checks on onboard systems, verifying connectivity, log-on status, and software versions, and documenting findings in **ServiceNow**.

SKILLS

Support Tools – ServiceNow, Jira, Confluence, ticketing systems, logging systems

Hardware Support – Ticket machines, communication devices, CCTV, WiFi, SIM cards, plug-out/plug-in equipment

Operating Systems – Linux, Windows

Troubleshooting – Basic diagnostics, device restarts, configuration updates, status review, software updates, system resets

Record Keeping – Asset tracking, inventory management, maintenance logs, reporting, equipment audits

PROJECTS

On-Bus System Health Monitoring and Support Workflow

- Developed a Python script to parse daily health check logs from onboard bus systems, identifying anomalies and flagging potential issues for proactive maintenance.
- Integrated the script with a basic notification service to alert the support team via email about critical system status changes, reducing manual log review time by approximately 40%.
- Designed a standardized process for documenting and escalating recurring hardware faults, improving communication between depot staff and central IT support.

Field Equipment Deployment and Tracking System

- Created a **Flask**-based web application to manage the deployment and return of onboard equipment (ticket machines, tracking units) to field technicians.
- Implemented a simple REST API for the application to allow for programmatic updates to equipment status and location, facilitating real-time inventory tracking.
- Built data validation routines to ensure accurate entry of equipment serial numbers and assignment details, minimizing data entry errors by an estimated 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
