## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Python** feature pipelines on **AWS Lambda** and **S3** to support downstream ML model scoring, processing approximately **3,500 events/sec** during peak hours.
- Acted as the primary technical point of contact for three enterprise customers during onboarding, gathering feature pipeline requirements and translating them into **Python** implementations.
- Engineered a **Java Spring Boot** REST API for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Containerized feature pipeline services using **Docker** and deployed them to a **Kubernetes** cluster (EKS), configuring resources and managing deployments via Helm charts.
- Designed and implemented feature extraction logic in **Python** and **SQL** to generate behavioural signals from a transaction log of roughly **1.1 million** records.
- Trained a **LightGBM classifier** on extracted transaction features, tuning class weights to address a **1:140** fraud imbalance and achieving approximately **0.91 AUC**.
- Collaborated with sales teams to provide post-sales technical demonstrations and walkthroughs for customer engineering teams integrating the ML platform.

## SKILLS

---

**Languages** – Python, Java, SQL, R, TypeScript

**Frameworks/Libraries** – Spring Boot, scikit-learn, pandas, NumPy, FastAPI, Flask, Hibernate, JPA, NestJS

**Cloud/Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

**Databases** – PostgreSQL, MySQL, Oracle

**ML/Data Tools** – MLOps, Power BI, Tableau, DAX, Power Query, RStudio

**Methodologies/Tools** – Agile, Scrum, CI/CD, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

## PROJECTS

---

### Customer Onboarding Playbook for ML Feature Store

- Worked directly with two pilot customers to design and ship a guided onboarding flow for an internal ML feature store, reducing time-to-first-feature from ~6 weeks to 9 days.
- Developed a **Python CLI** to validate customer feature definitions against the platform schema before submission, catching ~70% of schema errors at write time.
- Ran technical workshops with customer data teams to upskill their engineers on platform integration best practices.

### Fraud Detection Model on Transaction Features

- Engineered a feature pipeline in **Python** and **SQL** to extract behavioural signals from a transaction log of approximately **1.1 million** records.
- Trained a **LightGBM classifier** on the resulting features, tuning class weights to handle a 1:140 fraud imbalance and reaching ~0.91 AUC / 0.46 F1 on a held-out month.
- Packaged the model behind a **FastAPI** inference endpoint with input validation, achieving p95 latency around **180ms**.

## EDUCATION

---

**M.Sc. Data Analytics** — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science** — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
