PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Configured and tested **EHR application modules** based on vendor training and project requirements, supporting the implementation of a new digital system for patients.
- Contributed to **training development and readiness activities** for the EHR system, ensuring smooth transition and user adoption for healthcare staff.
- Provided **post-go-live support** for the EHR system, addressing critical issues and ensuring operational stability within the new hospital environment.
- Collaborated with **clinical healthcare professionals** and hospital administrators to gather requirements and translate them into actionable system configurations for the EHR.
- Managed **system integrations** between the EHR and other hospital operational platforms, ensuring data consistency across interconnected systems.
- Developed **Python scripts** to automate data validation and reporting tasks for healthcare operational workflows, improving data accuracy for approximately **1,500 patient records** per batch.
- Managed **production support** for enterprise applications, responding to P1/P2 incidents and maintaining SLAs in a regulated healthcare environment.

SKILLS

EHR Systems – Electronic Health Record, EHR application configuration, EHR vendor training, Digital Health
Healthcare Domain – Acute Hospital Setting, Paediatric Hospital Services, Clinical Applications, Healthcare Transformation

Core Technologies – Java, Spring Boot, Python, SQL, PostgreSQL, AWS, Docker, Linux

Data & Analytics – Power BI, Tableau, DAX, Power Query, pandas, NumPy, R

Project Management – Agile, Scrum, Change Management, UAT, Requirements Gathering, Confluence, Jira

PROJECTS

EHR System Configuration and Training Module

- Configured core modules of an **EHR system** based on detailed vendor specifications and user stories, supporting the implementation of a new national children's hospital.
- Developed and refined **training materials and documentation** for end-users of the EHR system, facilitating a smoother transition for clinical and administrative staff.
- Participated in **User Acceptance Testing (UAT)** cycles, coordinating feedback from healthcare stakeholders and ensuring system functionality met operational needs.

Healthcare Operations Data Automation

- Engineered **Python scripts** to automate the extraction, transformation, and loading (ETL) of patient demographic and appointment data from disparate sources into a centralized data warehouse.
- Built **Power BI dashboards** to visualize key operational metrics for hospital administrators, including patient throughput, appointment adherence, and resource utilization, enabling data-informed decision-making.
- Performed **SQL queries** against PostgreSQL databases to validate data integrity and generate ad-hoc reports for regulatory compliance checks, processing approximately **50,000 patient records** monthly.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
