PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot REST APIs** for core Webex services, handling approximately **1,500 requests per second** during peak loads.
- Developed and maintained backend microservices using **Java and Hibernate**, ensuring efficient data persistence and retrieval for user session management.
- Wrote comprehensive **JUnit and Mockito tests** for Java applications, increasing code coverage by **20%** and reducing production defects.
- Collaborated within an **agile team** to plan and estimate technical tasks for new feature development sprints, contributing to bi-weekly release cycles.
- Participated in **code reviews** for junior engineers, providing constructive feedback to maintain code quality and adherence to architectural standards.
- Managed the operational aspects of **highly available microservices** by analyzing logs in **Splunk** and responding to alerts in **Dynatrace**.
- Containerized backend applications using **Docker** and deployed them to **AWS EC2 instances**, managing configurations via **Git** and CI/CD pipelines.

SKILLS

Languages – Java, Python, SQL, Javascript

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools – Splunk, Dynatrace, Jira, Confluence

Analytics/BI – Power BI, Tableau, R/RStudio, DAX, Power Query

PROJECTS

Webex Collaboration Service Backend (HCL Technologies)

- Developed a **Java Spring Boot** microservice to manage user presence and real-time status updates for the Webex platform, processing over **1,000 status changes per minute**.
- Integrated the service with a **PostgreSQL** database using **Hibernate** for persistent storage of user profiles and configuration settings.
- Implemented comprehensive unit and integration tests using **JUnit**, achieving over **90% code coverage** for critical API endpoints.

Real-Time Analytics Pipeline for Collaboration Events (HCL Technologies)

- Engineered a **Python**-based data pipeline on **AWS Lambda** to process and enrich real-time collaboration events, handling approximately **3,500 events per second**.
- Developed data transformation logic using **pandas** to extract key metrics and prepare data for downstream analysis and dashboarding.
- Containerized the pipeline components with **Docker**, facilitating consistent deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
