PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** for a cloud platform, handling **~2,100 requests per second** during peak loads.
- Designed and implemented **RESTful APIs** using **Spring Boot** for inter-service communication within a distributed system, ensuring clear contract definitions and error handling.
- Refactored and optimized **Hibernate ORM** mappings and queries in a legacy Java application, improving data retrieval performance by **18%** for critical transaction processing modules.
- Collaborated with product managers and cross-functional engineering teams to gather requirements, design technical solutions, and estimate effort for new cloud platform features within Agile sprints.
- Containerized backend services using **Docker** and managed deployments to a **Kubernetes** cluster (EKS), configuring resource limits and basic health checks.
- Wrote and maintained **Python scripts** to automate recurring data validation tasks for cloud platform configurations, reducing manual effort by approximately **6 hours per week**.
- Participated in code reviews, providing constructive feedback on design patterns and code quality to junior engineers to ensure adherence to team standards.

SKILLS

Languages – Java, Python, Javascript, Golang

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, CI/CD

PROJECTS

Cloud Platform Service Orchestration (HCL Technologies)

- Developed a suite of **Java Spring Boot microservices** to manage and orchestrate cloud platform resources, including EC2 instance provisioning and S3 bucket configuration.
- Implemented a **REST API** layer for the orchestration service, allowing external systems to request and monitor platform deployments, achieving **~95% API uptime** over a 6-month monitoring period.
- Containerized the microservices using **Docker** and configured basic deployment manifests for a **Kubernetes** environment, facilitating reproducible builds and rollouts.

Automated Data Pipeline for Platform Monitoring (HCL Technologies)

- Engineered a **Python** data pipeline that processed logs from **AWS CloudWatch** and Dynatrace to generate daily operational reports.
- Wrote **SQL queries** against PostgreSQL to aggregate and transform metrics related to service health and performance from raw log data.
- Designed and implemented data extraction, transformation, and loading (ETL) logic using **pandas**, reducing manual report generation time by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
